

CX4 – ProFinish

Roller for Low-Viscosity coatings and superior aesthetic finish

Product description

The CX4 - ProFinish is a premium roller engineered for the controlled application of low-viscosity coatings such as topcoats with minimal fibre shedding. Featuring HiCap Felt technology, the roller utilizes endless filament fibres made from polyester. The fibre composition and design make the roller ideal for achieving a superior aesthetic finish and uniform coating thickness.

Technical Features

- Cleaning – No cleaning or taping required ready to use straight out of the pack.
- Paint loading – quick roller loading for a faster start.
- Pick-up capacity – high capacity and spreading rate for efficient application.
- Thermally bonded fibres – enhances durability and resistance to strong solvents.

Recommended Use

- Two-component and one component topcoats, zinc primers.
- Ideally suited for dipping in thinner and make smooth finish on Epoxy Passive Fire Protection (PFP).

Typical WFT thickness

Topcoats: 100 - 125 microns.

Coatings compatibility

Polysiloxane
Polyurethane
Alkyds
Acrylic
Zinc primers

Size	Product nr
5cm	400005
10 cm	400010
18 cm	400018
25 cm	400025
